Pages Tuesday, July 17, 2009 I have this fear that I may not be able to juggle all my duties with family, friends and work. I don't want to appear as having failed and I hope that I am not the only one to have such thoughts. It is what it is... life goes on and one has to adapt and pick up the pieces that fall from the sky and wish that they could just drift back into the sky. The last two weeks of school have been exhausting. They have felt like a time of chaos. Each day has been filled with expectations and the reality of how time runs can be too different for some. I have felt the pressure of the Monday end of the year feeling it slipping away. The pressure is hard to manage and I find that I am unable to stop it from taking over. This summer I have found myself with a lot of work and a lot of little things for me to do. I still do have some time to play and my heart would want me to share it with others but for now I keep busy and yet I find my brain beginning to wander. I can't seem to just enjoy the things I have done and I am beginning to feel the pressure of the work I have left to do. My house is a mess, my mind is messed up, the yard looks like a bomb went off, and my head has been spinning around. I need to take time for myself or I will burn out and not be able to help anyone anymore. It is that time of year when everyone starts asking for help and I find myself unable to help. I feel as if all I do is just push and push and then try to cover up the mess but when I am at my weakest and the pressure is on me, I fail. I need to take time to replenish.Hi there, I am sorry to hear about your loss. As you know, we are currently working on the movie and can't give out any details other than saying that we are working on it and it has many stars. Would you mind letting us know your thoughts and feelings on it
